

Cybersecurity in the Midst of Crisis

*Ensure your most valuable business
data do not succumb to COVID-19*

For Everyone

- **Maintain Physical Security**
 - Follow all office security policies
 - Dispose of sensitive data securely
- **Ensure a Secure Connection**
 - Avoid public Wi-Fi
 - Set up Multi-Factor Authentication (MFA)
 - Use encrypted communications
 - Set up firewalls
 - Use a secure VPN
- **Install Updates & Patches**
 - Install updates and patches regularly
- **Beware Social Engineering Scams**
 - Beware spear phishing attacks, other social engineering scams
- **Back Up Data**
- **Keep Separate Work Devices**

For Managers

- **Establish a WFH Policy**
- **Invest in Staff Cybersecurity Training**
- **Secure Remote Access Systems**
 - Test increased capacity
 - Limit privileges
 - Use protective DNS
- **Leverage IT Expertise**
 - Ensure IT staff can perform remote cybersecurity
 - Increase awareness of IT support for remote workers

Build Resilience

- **Know System's Recovery Baseline**
- **Review Disaster Recovery Procedures**
- **Update Incident Response Plans for Distributed Workforce**
- **Report Incidents to DHS CISA**
