F-8 Codebook 2004

IntDate04

*NOTE: The century months in this data begin counting at 1 from January, 1980. For example: century month 1 = January 1980; century month 13 = January 1981; century month 48 = December 1983; and so forth. Century month 0 = December 1979. (See Century Month Conversion Table.)

Users will likely need to reconcile these values with the default century month values of the statistical software being used. For example, STATA considers January, 1960 to equal century month 0. To correct this discrepancy, STATA users should add 239 ([20*12]-1) to the variable in century months.

TotalRes04

"ttlres04" is residence information for respondents that had parent interviews. In round 6, the childhood retrospective section was introduced to gather residence information from respondents who did not have a parent interview. This variable is called "ttlres04edt". "ttlres04" and "ttlres04edt" combined to create one FF variable, "**TotalRes04**."

DistMom04
DistDad04
DistMomQual04
DistDadQual04

*Note: "zip centroiding," which is used in the DistMomQual and DistDadQual variables, is the quality of the match for the distance in miles between the respondent's reported address and the mother's reported address. If the parent's or respondent's address cannot be found to assign latitude and longitude coordinates, a coordinate equaling the center of the zip code is assigned. This is less accurate than measuring the distance between the exact latitudes and longitudes for the addresses, but it offers an approximation.

TOTAL INCOME SELLING ILLEGAL DRUGS?

In 2003, about how much cash income did you make from selling or helping to sell marijuana, cocaine or other drugs?

The amounts reported are actual whole dollar amounts with no implied decimal places.

Truncated values are applied to the top 2 percent of respondents with valid non-missing responses. The lowest value for the top 2 percent of cases is used as the truncation level (\$650,000 for this variable). Values for all cases at or over that level are averaged. That average is then assigned to each of the top 2 percent of the cases.
