

Economics of Healthcare (PPHA 48050 / ECON 37710)

Syllabus¹

Prof. Joshua Gottlieb

Fall 2025

This version: September 1, 2025

Overview: This course provides graduate-level discussion of topics and methods in the economics of healthcare.

Objectives: This course has two objectives. The first is to teach current topics and methods in the economics of healthcare. The second is to advance students' development as economists by providing training in the production of high-quality research. This training may help students read, contribute to, and draw from recent progress in this literature.

The course covers a wide variety of applied econometric and theoretical approaches. It also discusses applications of a wide variety of datasets and methods that are useful in many settings for relevant research.

Requirements:

1. Required reading: Papers marked with two stars (**) are required reading for all students
2. 6-slide summaries: Each week, you will be required to prepare one 6-slide summaries (not including the title slide) of a paper on the reading list. **Submit these slides on Canvas by 10 pm the night before class.** I will randomly call on students to present their slides to class. You may choose among any of the papers for that week with one star (*) for these 6-slide summaries.
3. Referee Report: You will be required to write a 3-to-5-page referee report on a recent paper in the field. A list of suitable papers will be distributed in class.
4. Coding Project: To learn how to produce empirical research in line with the methods taught in this class, you will produce a replicable code package together with a short writeup, following the guidelines provided in the Week 6 readings.
5. Research proposal/data application: To help you get started on your own research ideas, and give you a head start on the bureaucracy that can be involved in applying for data, students will write the research proposal section of a CMS data application. You will have a chance to present this and get feedback during the last class meeting.
